Achmea FBTO

by Benny Bottema - Sunday, December 29, 2013

http://www.bennybottema.com/pcv_experience/fbto/

Worked on the FBTO website with a large team, which included the following components:

- Java Developer function, using mainly Struts
- Working experience also included working in Agile development process
- Completed several projects for FBTO integrating new products into the website. Many back-ends (backoffice, AS400, RDW etc.) were involved
- Completely rebuilt a large part of the website using Search Engine Optimization (SEO)

Read more about my experience with FBTO.
