Achmea Avéro

by Benny Bottema - Sunday, December 29, 2013

http://www.bennybottema.com/pcv_experience/avero/

Developed a new web-based front-end for Achmea Avero Zorg, which included the following components:

- Java developer function, focused on a JSF + Facelets front-end
- Large team consisting of developers, architects, testers and many back-end ties
- Short and very strict deadline, which we successfully made
- Other technologies I've used in this project: Spring, Flying Saucer, Richfaces + Ajax4JSF
